**Progress reported**

Progress in the provision of technical assistance and capacity building support:

Livestock, Breeding and Veterinary Department (LBVD) tried to pass ISO/IEC 17025:2017 for BSL II lab (Yangon and Mandalay Veterinary Diagnostic Laboratory) by the plan of 2018-2020 by cooperating with the regional accreditation body (MAB) and Singapore Accreditation Council (SAC) and has planned for Veterinary Assay Laboratory (VAL) for ISO certification in future based on the previous experiences on the way to ISO. The laboratory staffs from YVDL, MVDL and VAL were conducted the ISO trainings (like measurement uncertainty trainings) by the support of SAC in Yangon. These ISO activities are stunning now due to COVID-19 situation, staff shortage and the difficulties of the invitation of the international experts. Livestock, Breeding and Veterinary Department (LBVD) needs the international support to overcome the difficulties on the way of ISO and needs expert suggestions and trainings by the support of developing partners. In addition, Livestock, Breeding and Veterinary Department (LBVD) would like to request ISO/IEC accreditation training, human resource training, method validation training and measurement uncertainty trainings in the near future. Finally, Livestock, Breeding and Veterinary Department (LBVD) would like to request infrastructure like technical assistance and equipment. At present, the second test in the first case test result of the sample showed negative results has been conducting as a department laboratory testing procedure upon request by client. The SOP and directives are under preparation to allow the second tests. There are some validated test methods and parameters are already prepared and may need to expend testing other parameters. Laboratory test harmonization and recognition remain to be conducted. ARISE Plus Myanmar need to have technical assistance of the management and capacity building for accreditation, method validation and measurement uncertainty. In relevant sector such as Laboratory section are still required. ARISE Plus Myanmar provided technical assistance in laboratory accreditation (ISO:17025) process on food testing laboratories of Food and Drug Administration and private sectors (Proficiency testing of food testing laboratories including public and private laboratories and drawing of National Food Safety Policy). And as a result, two Food microbiology laboratories (one from public and one from private) got ISO 17025: 2017 accreditation and National Food Safety Policy was published and distributed in May 2022.

The Pesticide Residues Laboratory (PRL) received the technical assistance by the aid of UNIDO project, namely, "Strengthening NQI for trade in the Republic of the Union of Myanmar" for preparing ISO/IEC 17025:2017 accreditation. In order to fulfil of technical requirements, UNIDO provided technical expert for pesticide analysis by means of two phases in 2017, phase 1 was from 28.8.2017 to 1.9.2017 and the last was from 30.10.2017 to 3.11.2017. The fruitful results of those two phases were PRL knew exactly how to prepare technical requirements for accreditation and how to do Quenchers methods for proficiency testing (PT). After learning from expert, PRL passed four times in PT. In this case, PRL should need to do Quality Assurance Program including method validation for seven molecules and measurement of uncertainty in future to issue its reliable test report. ARISE Plus provided training for "Implementation of ISO/IEC 17025:2017" to staff of Food Testing Laboratories. Food Microbiology Laboratory got ISO/IEC 17025:2017 and on the other hand Food Chemical Laboratory is trying to get ISO/IEC certificate.

TACB support needs include:

TACB and financial and technical assistance for the test procedures are needed for those valuable trainings. In testing procedures, financial and technical assistance are still needed. Some food testing laboratories are ongoing process to get accreditation. They require technical assistance on Good Document Practice. Good Laboratory Practice, internal audit, Method development, method validation, calibration hands on training on analysis using sophisticated equipment take GCMSMS, LCMSMS etc. It is needed to provide training for the identification of plant pests and diseases regarding with Plant Quarantine activities and assistance for implementation of Post Entry Quarantine.

7.4.4

**Indicative date of implementation**

31 December 2022

**Definitive date of implementation**

31 December 2026

**Assistance required for implementation**

- Capacity Building for upgrading risk management system
- Technical Assistance and Capacity Building to specify the suitable Selectivity Criteria for Risk Categories, to lay down Regulations, Procedures and Risk Management Plan.
- Technical and Financial support for risk identification and regulating impact assessment
- Capacity Building to specify risk indicators for inspecting Passengers and vehicles

**Tags:** *Information and communication technologies (ICT), Legislative and regulatory framework*

**Donor Agencies:** to be determined

**Progress reported**

Progress in the provision of technical assistance and capacity-building support:

Myanmar Customs developed the Myanmar Customs Intelligent System (MCIS) in MACCS for risk management and assessment in 2016 with technical assistance from JICA. MACCS is able to automatically distinguish the Green (without inspection), Yellow (document examination), and Red channels (document and physical examination) according to the selectivity criteria in the system. Myanmar Customs has developed Risk Management Strategy (2022-2023) with technical assistance from IMF.

TACB support needs include:

TACB and financial assistance are needed on Training for upgrading risk management system; Technical Assistance and Training supporting to specify the suitable Selectivity Criteria for Risk Categories, to lay down Regulations, Procedures and Risk Management Plan; risk identification and regulating impact assessment and Training for specify risk indicators for inspecting Passengers and vehicles.

#### **Assistance required for implementation**

- Enactment of the relevant procedures regulations to guide operations.
- Increased institutional capacity, infrastructure and equipment.
- Harmonization of different systems among the border agencies and bordering countries.
- Training for staff of the various regulatory agencies at the border.
- Technical Assistance and ICT support for designing mechanisms for sharing of data and information.
- Capacity Building and staff training on border agency cooperation and sharing of international best practices on SSI/SWI.

**Tags:** *Information and communication technologies (ICT), Legislative and regulatory framework, Human resources and training*

**Donor Agencies:** to be determined

#### **Progress reported**

Progress in the provision of technical assistance and capacity building support:

Border cooperation such as Single Window Inspection and Single Stop Inspection in GMS CBTA will be scrutinized and implemented in accordance with the minimum requirements of the Article. The training for capacity building development of border and related agencies was provided by USAID in 2015 and the Department of Energy (DOE) of the USA in 2017 and during the period of 2019 and 2020 respectively. Myanmar needs to be engaged with developing partners for this measure.

TACB support needs include:

Enactment of the relevant procedures and regulations to guide operations; Increased institutional capacity, infrastructure, and equipment; Harmonization of different systems among the border agencies and bordering countries; Training for the staff of the various regulatory agencies at the border; Technical Assistance and ICT support for designing mechanisms for sharing of data and information and Capacity Building and staff training on border agency cooperation and sharing of international best practices on SSI/SWI.

**Assistance required for implementation**

- Technical and Financial Assistance to develop ICT (hardware and software) and to implement Single Window
- Technical and Financial Assistance to set up backend system in order to exchange Electronic Sanitary and Phytosanitary (e-SPS) Certificates via National Single Window Routing Platform and ASEAN Single Window Gateway.
- Technical Assistance and Capacity Building for system enhancement and integration of Port EDI System as a part of National Single Window.
- Technical Assistance and Capacity Building on formulating legislative and regulatory framework regarding Single Window.
- Capacity Building for awareness workshops and capacity building programmes.
- Capacity Building for human resources and trainings regarding e-SPS.

**Tags:** *Information and communication technologies (ICT), Legislative and regulatory framework, Infrastructure and equipment, Human resources and training, Awareness-raising*

---

**Donor Agencies:** to be determined

**Progress reported**

Progress in the provision of technical assistance and capacity building support:

The Blueprint for the Implementation of the National Single Window has been developed in 2018 with the aid of the World Bank Group. According to the loan for Customs Modernization Project that is a part of Myanmar Private Sector Growth and Competitiveness (PSGC) Project proposed by World Bank, US\$26.8 million will be cost for the process such as National Single Window establishment, software development, purchasing and installing hardware, building infrastructure, services such as technical advice, strengthening the Customs automation system, management and monitoring process. However, while negotiating with the World Bank Group regarding to get loan, the discussion has been delayed for various reasons. According to the existing Project of Capacity Development for National Single Window and Customs Modernization by Introducing Automated Cargo Clearance System (Phase 2) (2020-2023), a technical cooperation project, Japan International Cooperation Agency (JICA) is planning to set up brief design for National Single Window (NSW). However, the said project is going to be concluded on 30 June 2023 and, we need technical and financial assistance to develop ICT (hardware and software) infrastructure and to fully implement Single Window. Myanmar Port Authority (MPA) implemented Port EDI System in order to operate port related procedures including pre-arrival processing electronically with the Grant Assistance of JICA from 2015-2016 to 2018 2019. At present, MPA still needs TACB for system enhancement and integration with other systems such as MACCS, by which to develop a comprehensive community system that connects all related agencies and stakeholders in line with the concept and principles of implementing National Single Window.

TACB support needs include:

Technical and Financial Assistance is needed to develop ICT (hardware and software) and to implement Single Window. Technical and Financial Assistance is needed to set up backend system in order to exchange Electronic Sanitary and Phytosanitary (e-SPS) Certificates via National Single Window Routing Platform and ASEAN Single Window Gateway. TACB is needed for system enhancement and integration of Port EDI System as a part of National Single Window. TACB is needed on formulating legislative and regulatory framework regarding Single Window. TACB is needed for awareness workshops and capacity building programmes. TACB is needed for human resources and trainings regarding e-SPS.

- Capacity Building and Awareness Raising Workshops for amending and enacting laws and regulations of the Trade Related Departments in accordance with International Standards.

**Tags:** *Legislative and regulatory framework, Human resources and training, Awareness-raising*

---

**Donor Agencies:** to be determined

**Progress reported**

Progress in the provision of technical assistance and capacity building support:

Myanmar Automated Cargo Clearance System (MACCS) and Myanmar Customs Intelligence System (MCIS) have been operated in Yangon since November 2016 by Japanese grant aid, in Myawaddy border checkpoint since June 2018 and, in Muse and Chin shwe haw border checkpoints since April 2022 by Japan technical support. However, we need to expend the system to the border checkpoints with high trade volume in order to be common border procedures and uniform documentation requirements.

TACB support needs include:

Capacity Building and Awareness Raising Workshops are needed on amending and enacting Laws and regulations of the Trade Related Departments in accordance with International Standards.

	<b>Progress reported</b>	
	Progress in the provision of technical assistance and capacity building support:	
	<p>In Myanmar, the Transit Trade Procedure has been issued and is still being implemented to be in line with the provisions of TFA and RKC. Myanmar Customs has been developing the ASEAN Customs Transit System to operate in the ASEAN region. With the help of the EU (ARISE PLUS), all is in the hardware readiness of the ASEAN Customs Transit System (ACTS) in August 2020. In June and July 2022, ARISE PLUS had a training session on the ACTS system for the ACTS Central Management Team (CMT) of the ASEAN Secretariat. The CMT team will then resume practical training in Myanmar. In this case, it needs financial and technical assistance to implement ICT infrastructure and technical solutions from international experts. Especially, Myanmar Customs needs a long-term expert in implementing ACTS.</p>	
	TACB support needs include:	
	<ul style="list-style-type: none"> <li>- To provide best practices of customs control in affixing Customs Seals, and designing separate infrastructure (lanes, berth) for transit vehicles</li> <li>- To provide awareness-raising training and seminar regarding the transit guarantee</li> <li>- To provide technical assistance for Transit regulation which has been drafted in Myanmar Customs</li> <li>- To provide capacity building for customs officials in regard to Transit Operations and Controls</li> <li>- To provide capacity building for customs officials for Transit Cooperation and Coordination among regional and other customs administrations</li> </ul>
